Director Quotes & Behind the scenes info

- ” We work with people with intellectual disabilities in the integration center TWIS ALPI. Wojtek has Down syndrome. In Poland there are many stereotypes about people like this. We wanted to show in our film that many of this stereotypes are false, because disabled people can be just as creative and unique as the people healthy and they can also do amazing things.”
- Making a film with Wojtek was fantastic because he did not pay any attention to the camera. A great experience was watching a relationship between Wojtek and his dad.
