Director Quotes & Behind the scenes info

- The film was made during the director's third year at MoPA, with the theme of the year being « The garage ». "We had two months to complete this exercise, from story to implementation. I did hope to make people laugh with this short sequence, and, as a student, commend Laurel & Hardy. "
- "What I like about the one-minute format is the dynamic impact that it can create, particularly in the "comic".
- "I think what makes a great one-minute film is a really simple subject, maybe a dynamic construction, and few characters. In my mind the image aspect has to be clear and limpid."
